

User Levels - Admin, Manager, Staff, Client

- 1- Admins can add, remove users manually and update their data. Managers and Staff can only be added on the admin side.
- 2- Admins can define permissions and access levels for managers and staff. One user can have more permissions that only the admin can grant.
- 3- Admins can view revenue reports, track expenses, and manage finances. This dashboard will only be visible to the admin.
- 4- Managers track attendance, and manage staff schedules. They can change the schedule of the staff depending on their events or their availability.
- 5- Managers can track the performance of each staff member. They will have access to information regarding revenues, incomes, spendings, etc.
- 6- Managers can add ,remove and modify information about the movies including name, poster, screening time, etc.
- 7- Staff members can sell tickets, process reservations, and assist clients with seat selection.
- 8- Staff members must handle inquiries, resolve issues, and provide assistance to clients.
- 9- Clients should be able to browse movie listings, check showtimes, available seating, as well as movie information including its title, description, poster, a trailer, etc.
- 10- Clients should be able to book tickets using the app, including choosing the seating, screening, and cinema that the movie is being displayed in, as well as preorder snacks or beverages for pickup at the theater.
- 11- Clients should be able to track upcoming movies they're interested in, get notified when the movie is screening, enroll in loyalty programs and redeem benefits.
